Lab-1

Statement:

Before you design your own CV in Assignment 1, practice the raw skeleton: build a semantic HTML5 skeleton (no styling required) for a generic e-commerce homepage — correct <header>, <nav> with at least 4 links, a <main> containing three <section>s (featured products, categories, newsletter signup), and a <footer> with at least three columns of links. Validate your HTML with the [W3C Validator](#) and include a screenshot of a clean validation result in your completion PDF.

Code:

```
<!doctype html>

<html lang="en">

  <head>

    <meta charset="UTF-8" />

    <meta name="viewport" content="width=device-width, initial-scale=1.0" />

    <title>My E-Commerce Store</title>

  </head>

  <body>

    <header>

      <div class="store-name">

        <h1>Farhan Store</h1>

      </div>

      <div class="motto">

        <p>Quality Products for Everyone</p>
```

</div>

</header>

<nav>

<div class="nav-container">

<div>Home</div>
