

Muhammad Farhan

FA24-BCS-067

Assignment#1 Task

Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

A header with your name, a short professional tagline, and a photo (a placeholder image is fine).

An “About Me” section.

An “Education” section listing your academic history in a semantic list or table.

A “Skills” section.

A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.

Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.

Styling entirely in a separate `styles.css` file (external stylesheet, not `inline style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Solution:

Index.html:

```
<!doctype html>
```

```
<html lang="en">
```

```
<head>
```

```
<meta charset="UTF-8" />
```

```
<meta name="viewport" content="width=device-width, initial-scale=1.0" />

<title>Muhammad Farhan - Resume</title>

<link rel="stylesheet" href="style.css" />

</head>

<body>

  <header>

    <nav>

      <div class="nav-content">

        <div class="avatar">

        </div>

        <div class="profile-text">

          <h1>Muhammad Farhan</h1>

          <p>Aspiring MERN Stack Developer</p>

        </div>

      </div>

    </nav>

  </header>

  <hr />

  <br />

  <main>

    <section class="about heading-main">

      <h2>About Me</h2>

      <p>

        Motivated Computer Science undergraduate at COMSATS University

        Islamabad, Lahore Campus, with a solid foundation in full-stack web

        development, database management, and software engineering. Passionate
```

about bridging the gap between AI and web development to build intelligent, data-driven applications that solve meaningful real-world problems.

</p>

</section>

<section class="education heading-main">
